

NC1000 NetBox Central Office Router

Main Features

The main features are:

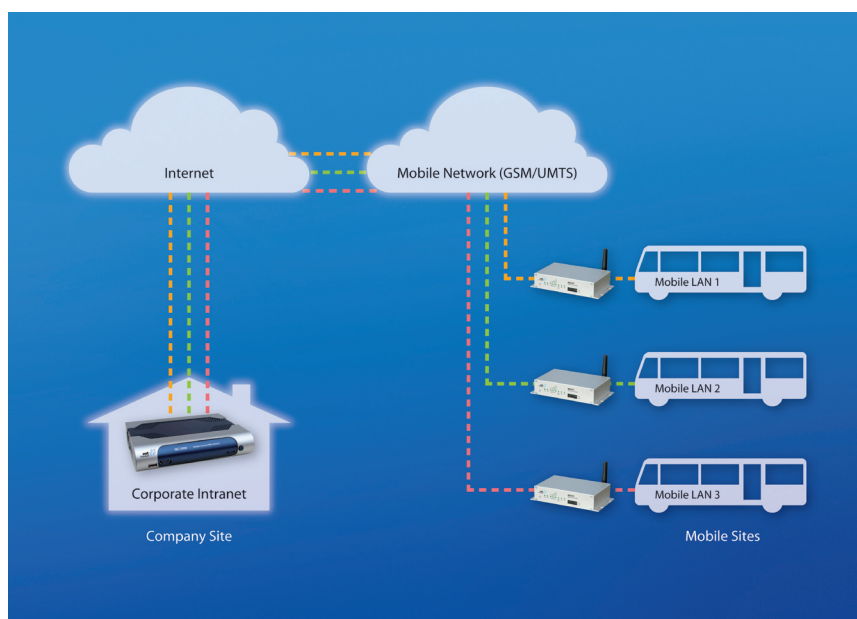

- Industrial grade central office router
- OpenVPN server
- Preconfigured for use with NetBox Wireless Routers
- Graphical user interface for intuitive administration
- Easy to install and configure

NC1000 NetBox Central Office Router

The NC1000 NetBox Central Office Router is the perfect counterpart for all NetBox Wireless Routers. It terminates incoming OpenVPN connections and is the gateway to your remote mobile sites.

Expand your corporate Intranet with the help of mobile networks and integrate remote and mobile sites such as vehicles and intelligent supervisory devices into your corporate Intranet. This network solution consists of a NetBox Central Office Router and one NetBox Wireless Router on each mobile site.

The solution provides secure two-way communication using static IP addresses and is therefore operator independent. It is the solution of first choice when it comes to international projects.

VPN with NC1000 and NetBox Wireless Routers -- Expand the Intranet to mobile sites

Technical Data	
Core system:	CPU: VIA C3 1GHz RAM: 512 MB HDD: 80GB (7x24h) Industrial grade
Interfaces:	1 LAN: 1 x 10/100 BaseT 2 COM ports 3 USB host ports 1 VGA port 1 parallel port 1 PS/2 keyboard connector 1 PS/2 mouse connector
Dimension:	Width: 234mm Height: 48.5mm Depth: 175mm
Weight:	Weight: 1.1kg
Power supply:	External AC/DC Power Adapter 60W maximum
Environmental conditions:	Temperature range: 0..+40 °C Humidity: 10..90%
Certifications:	CE FCC RoHS
Software:	Operating system: - Linux Application: - Preinstalled and easy to configure OpenVPN solution - Graphical user interface for comfortable administration
